OLDFIELDS

S C H O O L

ALL GIRLS | GRADES 8 - 12 | DAY, 5 & 7-DAY BOARDING OPTIONS

PROVIDING A COLLABORATIVE, INDIVIDUALLY TAILORED CURRICULUM
TO FOSTER BOTH ACADEMIC AND PERSONAL GROWTH.

Why Oldfields?

- Because a small school creates big opportunities.
- Because you will find your home.
- Because an all-girls' education is life-changing.
- Because the world needs more leaders with Courage, Humility, and Largeness of Heart.

Our Signature Programs:

EQUINE SCIENCE CONCENTRATION: This concentration is for students who are passionate about horse care and horsemanship, interested in studying equine or veterinary science in college, and/or want to work in the horse industry. It combines traditional academic classes with hands-on education in the barn and individualized experiential learning opportunities.

THE PATHWAYS PROGRAM: This program provides invaluable life skills to our students by fostering connections between current students and alumni. Through the three components of the Pathways Program: Career, Pursue Your Passion, and Practical Pathways, students will explore their interests, build their skills, and gain practical experience.

RIDING PROGRAM: The Oldfields Riding Program is dedicated to inspiring our riders to pursue a path of continued growth. Our goals are to develop and enhance a yearning for knowledge, to value the character of the horse and the integrity of the sport, to honor the path of the individual, and to savor the process of learning and the lessons discovered from our relationships with horses.

MAY PROGRAM: Each year a variety of experiential learning programs are offered. Students can choose one or two-week opportunities to take a deep dive into an existing passion or learn something totally new! The programs span the spectrum from on-campus activities to international travel, from across town day trips to locations all over the country. What they all have in common is that our students view the world and themselves in a new way upon completion of this life-changing experience.
