

### CROYA Peer Leadership Training Program

Last Thursday, CROYA stopped by our campus during community time to do peer leadership training with the freshman class! The program focuses on peer relationship skills, including empathy, effective communication and listening, non-judgmental acceptance and healthy boundaries. These sessions are insightful, and the girls enjoy learning these vital skills.

We know that at Woodlands, great leaders have a variety of personalities, interests, and skills valued by communities. We are grateful that our students can take on and discover leadership roles before their junior and senior year. Programs such as this continue to prepare students to be the thriving changemakers of tomorrow.
